

Proflora®4R

SPORE-BASED PROBIOTIC

SUPPORTS MICROBIAL BALANCE AND G.I. HEALTH*

AVAILABLE IN 30 COUNT CAPSULES

"Pill fatigue" is real for many people. When it comes to compliance with supplement protocols, it can be a frustrating hurdle to clear. That's one of the reasons Biocidin® creates formulas that provide broad activity.

Proflora®4R is a unique spore-based probiotic that supports optimal health in multiple ways in just one capsule a day.* It contains a combination of three, proven spore-forming microorganisms (*Bacillus* species) that promote microbial diversity and a healthy inflammatory response.* Marshmallow root and aloe vera extract provide additional support for healthy microbial balance and digestive comfort.* Highly bioavailable quercetin adds potent antioxidant activity and helps regulate histamine.*

Spore-forming probiotics are health-promoting, commensal bacteria found in our G.I. tract. The bacterial endospores in Proflora®4R offer several advantages over conventional, non-spore-forming probiotics. Unlike conventional probiotics, Proflora®4R:

- Reaches the intestines 100% of the time
- Will survive stomach acid
- Resists bile salts
- Maintains efficacy during antibiotic therapies
- Does not require refrigeration

Proflora®4R contains probiotic bacteria shown to play a primary role in the development of protective Gut-Associated Lymphoid Tissue (GALT).* Because it produces higher levels of lactic acid than non-spore-forming probiotics, it provides robust support for a healthy immune response.* It also produces beneficial byproducts such as B vitamins, Vitamin K2, carotenoid antioxidants, and enzymes such as nattokinase – all while supporting healthy digestion of food and the absorption of nutrients.*

It's a great stand-alone product and is also recommended as a perfect addition to Biocidin® protocols.

Benefits

- Supports healthy immunity*
- Supports microbial balance in the GI tract*
- Assists in maintaining intestinal health for improved digestion of food and absorption of nutrients*
- Maintains a healthy gut barrier*
- Promotes a healthy inflammatory response*
- Maintains key health-promoting gut bacteria*
- Plays a primary role in the development of Gut-Associated Lymphoid Tissue (GALT)*

Features

- Professional-grade ingredients
- Does not require refrigeration
- Designed to survive stomach acid
- May be taken with antimicrobials and/or antibiotics
- Concurrent use with Biocidin® recommended
- Produces beneficial byproducts such as B vitamins, vitamin K2, carotenoid antioxidants, and enzymes such as nattokinase*

Scientific literature shows that the individual ingredients in Proflora®4R have multiple activities. Below are highlights that may account for the outcomes seen in a clinical setting.

- Antioxidant** – Quercetin
- Immunomodulatory** – Aloe Vera, *Bacillus clausii* SC-109, *Bacillus coagulans* SC-208, *Bacillus subtilis* HU58™, Quercetin
- Mucilage** – Marshmallow
- Supports Healthy Elimination** – *Bacillus clausii* SC-109, *Bacillus coagulans* SC-208, Marshmallow
- Supports Healthy Gastrointestinal Flora** – *Bacillus clausii* SC-109, *Bacillus coagulans* SC-208
- Supports Healthy Inflammatory Response** – Aloe Vera, *Bacillus coagulans* SC-208, *Bacillus subtilis* HU58™, Quercetin
- Supports Microbial Balance** – Aloe Vera, *Bacillus clausii* SC-109, *Bacillus subtilis* HU58™, Marshmallow

“Love this supplement. Works well even while using high doses of antibiotics. I normally have to take 5-6 regular probiotic capsules to even come close to the benefit of one of these capsules... Highly recommend.”

– KRISTIN B.
